Well Details		
Well Name	Exampe Auto SlidePro Max	
KOP	1900	m MD
End of Build Section	2300	m MD

Slide Pro Setup		
Distance from Bit	1600	m
Average Pressure Drop	2800	kPa
Activation Setting	50	

**Tool Auto Activation and De-Activation**

The SlidePro Friction Breaking Tool uses an internal mechanism to lock the axial vibration motion in the vertical section. As the SlidePro tool approaches the build section, the tool unlocks to generate a stronger friction breaking motion. The SlidePro FBT will also de-activate when pulled back into vertical.

<b>SLidePro Activation Point</b>	<b>Sliding 1443 m MD</b>
<b>Kick Off Point</b>	<b>1900 m MD</b>
<b>SlidePro Activation Point</b>	<b>Rotating 1648 m MD</b>
<b>End of Build</b>	<b>2300 m MD</b>

Results	Depth	
SlidePro Depth Activation	1648	m MD
Bit Depth Activation	3248	m MD

**Sliding Bit Depth at Activation** 3043 m MD  
**Rotating Bit Depth at Activation** 3248 m MD

**No Ball or Dart required.**
